

ProBatter™

The Ultimate Training Tool for Hitters

ProBatter. PX3 Softball Video Pitching Simulator

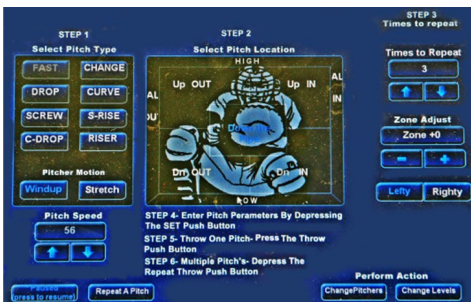

ProBatter's revolutionary new PX3 line of video simulators is ProBatter's third generation of video simulators since it introduced its first one in 1999. Relying on cutting edge technology and incorporating the lessons learned from the prior generations, the PX3 units combine the best features of the past with the advantages offered by present day technology.

The PX3 Softball video pitching simulator is the Gold Standard of pitching simulators, used at all levels of the sport from professional teams, to major colleges, and training centers and batting cages throughout the world. In addition, individual players (and their parents) routinely purchase these units for personal use at home or a local facility.

The ProBatter PX3 Softball simulator:

- Is fully programmable using a user-friendly, kiosk mounted, touchscreen controller
- Can interchangeably throw 8 or more different pitches, e.g., fastballs, changeups, risers, drops, curves, etc. from both RHP and LHP in various sequences to a variety of locations at speeds to 100 MPH
- Can be adapted for different age levels
- Offers choices of video images of different pitchers
- Pitches with pinpoint accuracy
- Comes complete with an automatic feeder system
- Is available as a "Combo" unit with softball or cricket.

ProBatter Sports

Better Practice Better Play™

The PX3 Softball Simulator offers several advantages over earlier ProBatter softball versions, most notably enhanced HD video quality, a superior projector, and an improved touchscreen controller. More importantly, at price that is almost half the selling price of the PX2 Softball product, it's **VERY AFFORDABLE**. We even offer, as an added option, ball tracking software products such as the Hittrax or Rapsodo simulators which easily integrate with the PX3.
