

Patents

[6,820,605](#) – System and method for reducing time between pitches in a spring-actuated pitching machine

[6,705,305](#) – Mounting frame for use with a kit for converting conventional pitching machine into a video pitching machine

[6,675,792](#) – Kit for converting conventional pitching machine into a video pitching machine

[6,672,298](#) – Method for profiling pitches using a computerized, programmable pitching machine

[6,637,418](#) – Kit for converting conventional, spring-actuated pitching machine into a video pitching machine

[6,612,942](#) – Ball for pitching machine

[6,546,924](#) – Ball throwing machine and method for profiling pitches

[6,513,512](#) – Pitching system with video display means

[6,470,873](#) – System and method for establishing pitch parameters in a ball-throwing machine

[6,186,134](#) – Pitching system with video display means

[6,186,133](#) – System and method for establishing pitch parameters in a ball-throwing machine

[6,182,649](#) – Ball-throwing machine

[6,443,141](#) – Method of modifying the release points of pitches from a video pitching machine
