

STRIKE OUT PRO™

by **ProBatter Sports®**

WHAT IS IT?

Strike Out Pro™ is a new, hi-tech pitching system that displays the video images of actual batters on a projection screen with portions of the strike zone highlighted as “hot zones” for the pitcher to try to hit. Both right-handed and left handed batters can be displayed and the hot zones can be varied from batter to batter using a wireless tablet. At the end of the session, the speed and accuracy of each pitch are displayed on the tablet. The system can even be pre-programmed to allow the pitcher to pitch a simulated game against a particular batting order.

FEATURES INCLUDE

- CONTROLLED – using a wireless tablet
- ACCURATE – precisely tracks pitch speeds and locations
- LIFE-LIKE – displays life-sized batters of all types
- MULTIPLE TARGETS – displays different zones to target
- ANALYTICS – records and stores data for analysis and development
- Catcher image moves to reflect different hot zones

WHO IS IT FOR

Strike Out Pro is ideal for pitcher training at all levels as well as for fan use at stadiums, amusement and entertainment venues.
